Chairman

MEMORANDUM:

To: Solano County Airport Land Use Commission
From: Jim Leland, Principal Planner
Subject: **ITEM 9C: Workshop:** Receive a presentation from the City of Vacaville on the update to their general plan. (Affected airports: Nut Tree Airport and the Travis AFB). **Non-Action Item.**

Meeting Date: January 8, 2015

RECOMMENDATION

Receive a presentation from the City of Vacaville on the update of their General Plan. A consistency determination will be scheduled for the February 12, 2015 Regular Meeting.

Exhibit 1: Required Tests for Consistency for General Plan Amendments

The Solano Countywide Airport Land Use Review Procedures require the review of all amendments to a local agency's general plan, consistent with the State law. In order to be considered fully consistent with the applicable compatibility plan(s), the general plan revisions proposed must meet two specific tests, as identified in the California Airport Land Use Planning Handbook (January 2011). The tests are:

1. Elimination of any direct conflicts between the General Plan and relevant compatibility plan(s).

Direct conflicts primarily involve general plan land use designations which do not meet the density (for residential uses) or intensity (for non-residential uses) criteria specified in the compatibility plan, although conflicts with regard to other policies also may exist.

2. Delineation of a mechanism or process for ensuring that individual land use development proposals comply with the ALUC's adopted compatibility criteria.

Elimination of direct conflicts between a county's or a city's general plan and the ALUC's compatibility plan is not enough to guarantee that future land use development will adhere to the compatibility criteria set forth in the compatibility plan. An implementation process must also be defined either directly in the general plan or specific plan or by reference to a separately adopted ordinance, regulation, or other policy document.

There are three facets to the process of ensuring compliance with airport land use compatibility criteria:

a. Delineation of Compatibility Criteria- Airport land use compatibility criteria must be defined either in a policy document adopted by the county or city or through adoption of or reference to the ALUC's compatibility plan itself.

b. Identification of Mechanisms for Compliance- The mechanisms by which applicable compatibility criteria will be tied to an individual development and continue to be enforced must be identified. A conditional use permit or development agreements are two possibilities.

c. Indication of Review and Approval Procedures- Lastly, the procedures for review and approval of individual development proposals must be defined. At what level within a county or a city are compatibility approvals made: staff, planning commission or governing body? The types of actions which are submitted to the ALUC for review and the timing of such submittals relative to internal review and approval process also must be indicated.
