

## **REBUTTAL TO ARGUMENT IN FAVOR OF MEASURE N**

Are we tired of Dixon's deteriorating streets and potholes, or are we more tired of giving our tax dollars to the City to waste on management salaries, projects like the Pardi market site, Jack hole, the train station, million dollar lawyers and consultants to do work top staff should do.

Over the years, sales taxes climbed from under 4 percent to 8 percent or more. Just like other taxes and fees. They always argue "it is just a small increase", but they never have enough.

Measure "N" proponents argue it will fund maintenance and construction of the City's roads. How about the money they receive from gasoline taxes and other sources?

Despite repeated requests, the City has not explained where the money, already paid for the Parkway Boulevard overcrossing, has gone.

They claim more of your tax money makes them "more competitive" for grants. More free money? Where do they think "grants" come from? Grants come with strings and end up costing more and wasting money.

We should be proud Dixon's sales tax rate is lower than other Solano Cities - giving Dixon businesses a competitive advantage over other cities.

DON'T TRUST politicians who repeatedly provide misinformation, ignore cost saving technologies, waste YOUR money and can't account for it.

If N passes, the City will funnel more to staff, consultants, and attorneys – their top priorities - while projects benefiting all citizens sit on the back burner.

Vote No on Measure N. Tell them to start spending OUR money wisely.
