PROGRAM FOR SPECIAL INSPECTION

SPECIAL INSPECTION AND TESTING AGREEMENT

To permit applicants of projects requiring special inspection and/or testing per California Building Code Sec. 1701

Project Address: _____ Permit No.: _____

BEFORE A PERMIT CAN BE ISSUED: The owner, or the engineer or architect of record, acting as the owner's agent, shall complete this agreement and the attached Special Inspection and Testing Schedule, including the required acknowledgments. A pre-construction conference with the parties involved may be required to review the special inspection requirements and procedures.

APPROVAL OF SPECIAL INSPECTORS: Special inspectors may have no financial interest in projects for which they provide special inspection. Special inspectors shall be approved by the building department prior to performing any duties. Special inspectors shall submit their qualifications and are subject to personal interviews for prequalification. Special inspectors shall display approved identification, as stipulated by the Building Official when performing the function of special inspector. Special inspection and testing shall meet the minimum requirements of the California Building Code Section 1701. The following conditions are also applicable:

A. Duties and Responsibilities of the Special Inspector:

1. **Observe work** – The special inspector shall observe the work for conformance with the building department approved (stamped) designs drawings and specifications and applicable workmanship provisions of the California Building Code. Architect/Engineer-reviewed shop drawings may be used only as an aid to inspection. Special inspections are to be performed on a continuous basis, meaning that the special inspector is on site in the general area at all times observing the work requiring special inspection. Periodic inspections, if any, must have prior approval based on a separate written plan reviewed and approved by the building department and the architect or engineer of record.
2. **Report nonconforming items** – The special inspector shall bring nonconforming items to the immediate attention of the contractor and note all such items in the daily report. If any items are not resolved in a timely manner or are about to be incorporated in the work, the special inspector shall immediately notify the building department by telephone or in person, notify the engineer or architect, and post a discrepancy notice.
3. **Furnish daily reports** – On request, each special inspector shall complete and sign both the special inspection record and the daily report form for each day's inspections to remain at the job-site with the contractor for review by the building inspector.
4. **Furnish weekly reports** – The special inspector or inspection agency shall furnish weekly reports of test and inspections directly to the Building Official, engineer or architect of record, and others as designated. These reports are to include the following:
 - a. Description of daily inspections and tests made with applicable locations.
 - b. Listing of all nonconforming items.
 - c. Report on how nonconforming items were resolved or unresolved as applicable; and
 - d. Itemized changes authorized by the architect, engineer and Building Official if not included in nonconformance items.
5. **Furnish final report** – The special inspector or inspection agency shall submit a final signed report to the Building Official stating that all items requiring special inspection and testing were fulfilled and reported and, to the best of his or her knowledge, in conformance with the approved design drawings, specifications, approved change orders and the applicable workmanship provisions of the California Building Code. Items not in conformance, unresolved items or any discrepancies in inspection coverage (i.e. missed inspections, periodic inspections when continuous were required, etc.) shall be specifically itemized on an addendum to this report.

B. Contractor Responsibilities:

- 1. Notify the special inspector** – The contractor is responsible for notifying the special inspector or agency regarding individual inspections for items listed on the attached schedule and as noted on the building department approved plans. Adequate notice shall be provided so the special inspector has time to become familiar with the project.
- 2. Provide access to approved plans** – The contractor is responsible for providing the special inspector access to approved plans at the job-site.
- 3. Retain special inspection records** – The contractor is also responsible for retaining at the job-site all special inspection records submitted by the special inspector upon request.

C. Owner Responsibilities: The project owner or the engineer or architect of record acting as the owner’s agent is responsible for funding special inspection services (ref. CBC Sec. 1701).

D. Designer Responsibilities:

- 1. Complete the Special Inspection & Testing Schedule** – The engineer or architect of record shall specify special inspection required in the construction documents and list these items on the Special Inspection & Testing Schedule on the plans.
- 2. Respond to field discrepancies** – The engineer or architect of record shall respond to uncorrected field deficiencies in design, material, or workmanship observed by the special inspector.
- 3. Document verbal approval of deviation from approved plans** – The engineer or architect of record shall submit to the Building Official and to the special inspection agency written approval of any verbally approved deviations from the approved plans.
- 4. Submit design changes** – The engineer or architect of record is responsible for any design changes, in addition to acknowledgment and approval of shop drawings which may detail structural information, and for submission of such changes to the Building Official for approval.

E. Building Department Responsibilities:

- 1. Approve special inspection** – The building department shall approve all special inspectors and special inspection requirements.
- 2. Enforce special inspection** – Work requiring special inspection and the performance of special inspection shall be monitored by the building inspector. His/her approval must be obtained prior to placement of concrete, covering of structural steel, or other similar activities in addition to that of the special inspector.
- 3. Issue Certificate of Occupancy** – The Building Official may issue a Temporary Certificate of Occupancy or a Certificate of Final Completion and Occupancy after all special inspection reports and the final compliance report have been submitted and accepted.

ACKNOWLEDGEMENTS

I have read and agree to comply with the terms and conditions of this agreement:

SPECIAL INSPECTION AND TESTING SCHEDULE

1. **Concrete:**
 Continuous placement inspection
 Exceptions _____
 _____ Cylinders per _____ CY
 Test: _____ @ 7 _____ @ 28 _____ Hold
2. **Bolts installed in concrete:**
 All bolts
 Location: _____
3. **Special moment-resistant concrete frame:**
 As indicated
 Location: _____
4. **Reinforcing steel and prestressing tendons:**
 Placement inspection
 Stressing and grouting of tendons
5. **Structural Welding:**
Periodic Visual Inspection:
 Single pass fillet welds $\leq 5/16"$
 Steel deck
 Welded studs
 Cold formed studs and joists
 Stair and railing systems
 Reinforcing steel
Continuous Visual Inspection:
 All other welding
 Reinforcing steel
 Other: _____
Special moment-resistant frames:
 UT all CJP groove welds
 UT all CJP groove welds $>5/16"$
 UT all PP groove welds in column splices
 UT all PP groove welds in column splices $>3/4"$
 UT column flanges at beam flange welds
 NDT rate reduction per UBC 1703.1 applies
 Other: _____
6. **High Strength bolting:**
 Snug Tight: All
 As indicated
 Full Pretension All
 As indicated
7. **Structural Masonry** $f_m = \underline{\hspace{2cm}}$, Stresses $\underline{\hspace{2cm}}$.
 Verification of f_m : Prism tests
 Prism test record
 Unit strength
 Continuous inspection
 Periodic inspection: _____
7. **Structural Masonry (continued):**
 Test: Before During
 Prism
 Units
 Grout
 Mortar
8. **Reinforced gypsum concrete:**
 Continuous inspection of mixing and placement
 Periodic inspection _____
 Strength testing _____
9. **Insulating concrete fill:**
 Periodic inspection _____
 Strength testing _____
10. **Spray-applied fire resistive materials**
 Periodic inspection _____
 Testing per UBC Std. 7-6
11. **Piling, drilled pier and caisson**

	Continuous	Periodic
Pile Driving	<input type="checkbox"/>	<input type="checkbox"/>
Drilling	<input type="checkbox"/>	<input type="checkbox"/>
Testing	<input type="checkbox"/>	<input type="checkbox"/>
12. **Shotcrete:**
 Continuous placement inspection
 Preconstruction panel
 In-place cores
Strength testing:
 Test panel
 In-place cores
13. **Special grading, excavation, and filling:**
 Periodic Inspection
 Subgrade tests _____
 Compaction tests _____
 Verify bearing strata
14. **Smoke control systems:**
 Periodic inspection
 During system testing
15. **Special cases:**
 Shear wall/diaphragm masonry
 Anchorage to existing concrete/masonry:
 Installation inspection
 Proof load testing
 Shoring
 Underpinning

Notes: _____

SPECIAL INSPECTION AGENCY RECOGNITION LIST

¹ Agencies have not been evaluated for nondestructive testing. *Agency sub-contracts laboratory services.

Other agencies may also be qualified; the local Building Official has the ultimate responsibility for approval. This list is updated annually and may therefore, not necessarily reflect the most current list of recognized agencies. Agencies have not been evaluated for geotechnical special inspections. Agencies may have more than one location.

Key: RC = Reinforced Concrete PC = Prestressed/Post-tensioned Concrete SM = Structural Masonry
 SS = Structural Steel Welding/Bolting FP = Spray-Applied Fireproofing URM=Unreinforced Masonry Push/Torque Tests
